

NHIA VUE

FULL-STACK DEVELOPER | REACT | JAVASCRIPT

Eau Claire, WI | (608)790-4909 | vuenhia12@gmail.com | [linkedin](#) | [github](#)

TECHNICAL SKILLS

Frontend: Html, CSS, Javascript(React)

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, SQL

Tools: Git, GitHub, Postman, Chrome DevTools, VS Code

Core: Full-Stack Development, API Design, Debugging, Testing, Problem Solving

PROJECTS

Kanban Board | Full-Stack Web Application | <https://github.com/vuenhia/Kanban>

- Built a full-stack task management application connecting React, Express, and MongoDB.
- Designed REST API endpoints for task creation and retrieval.
- Built custom drag-and-drop functionality with React state management for dynamic task movement.
- Designed a Mongoose schema and integrated MongoDB for persistent task storage.
- Identified and resolved 10+ bugs using Postman and Chrome Devtools.

Expense Tracker | React Web Application | <https://github.com/vuenhia/expensetracker>

- Built a React expense tracker with real-time income, expense, and budget calculations using React state management.
 - Automated budget allocation by implementing the 50/30/20 budgeting rule with JavaScript.
 - Tested 5+ edge cases including negative values, invalid inputs, and formatting errors
 - Performed regression testing across every update, ensuring version is stable before pushing to repo.
-

EXPERIENCE

Warranty Center Associate | Menards | 2022 – Present

- Troubleshoot operational problems by identifying the cause of an issue, adapting processes when needed, and finding practical solutions to keep work moving efficiently.
 - Identify potential equipment and workflow issues before they disrupt operations by inspecting trailers, verifying dock lock conditions, and removing materials that could cause pallet-sorting equipment to jam.
 - Quickly learn new positions and responsibilities by observing existing processes, asking targeted questions, and adapting to changing operational requirements.
 - Train 15+ new team members, manager trainees, and interns on department workflows, explaining how processes work, answering questions, and helping them get comfortable with their responsibilities.
-

EDUCATION

Chippewa Valley Technical College, Eau Claire, WI

Associate Degree in Information Technology – Software Development | May 2024

IT-Software Developer Program Scholarship | John Moseng Information Technology Endowment Scholarship
